

## **February 8, 2017 Meeting Minutes**

The Triple Divide Watershed Coalition held a conference call with Campbell Scientific.

- Campbell Scientific stated that they will be flexible in accommodating the various needs of each water system.
  - o CS thoroughly explained each piece of equipment that will be installed at the 19 Water Systems
    - Conductivity Sensors, Interfaces, Loggers, Modems, Enclosures, and Viewers.
    - Conductivity sensors will be placed within pipes or within the surface water source. The interface allows the conductivity sensor to stay balanced based on the charge within the water. The logger will collect measurements for data collection from the interface and the sensor. The modem will allow for the best communication to be made between the sensor and you! The Enclosure protects the equipment.
    - Please feel free to contact Campbell Scientific at any time if you have any questions
      - **Campbell Scientific Contact information:**  
  
***Steve Gunderson***  
  
***Phone: 1(435)-227-9772***  
  
***Email: sgunderson@campbellsci.com***
- Mark Stephens suggested another consensus to be made prior to making any agreements with Campbell Scientific.

The next Triple Divide meeting will be announced at a later date.
